We can have multiple websites running over the same MAMP installation.
Welcome to WordPress. This is your first post. Edit or delete it, then start writing!

Get WordPress

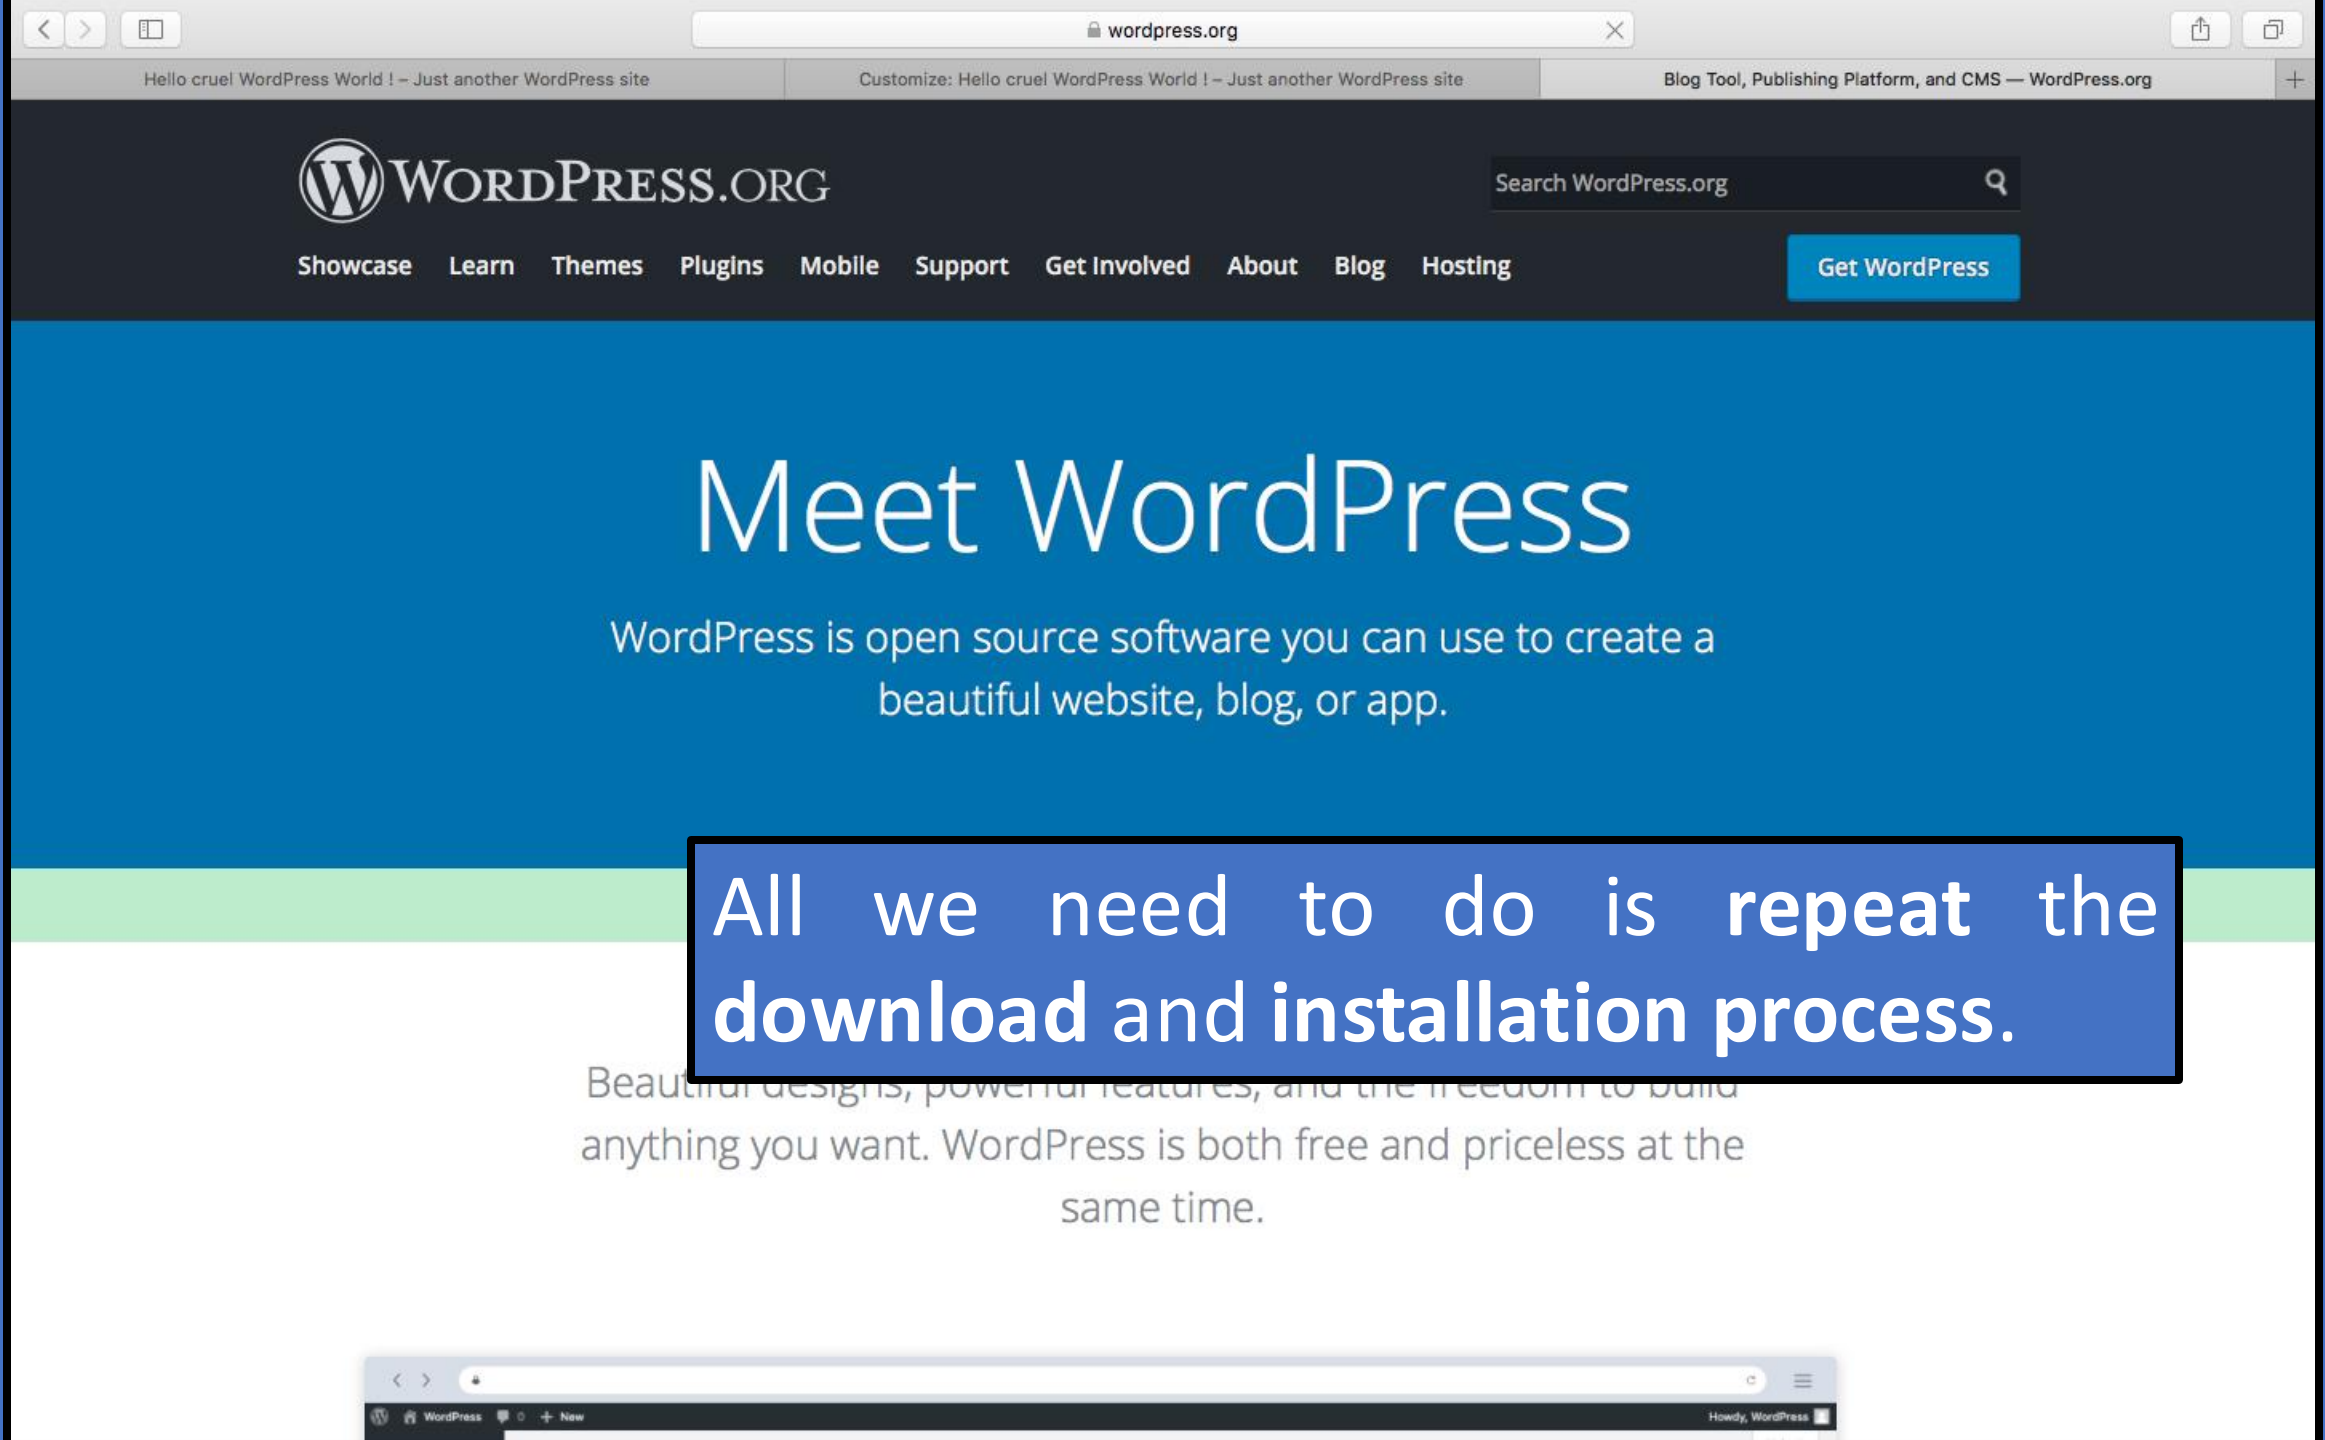

Meet WordPress

WordPress is open source software you can use to create a beautiful website, blog, or app.

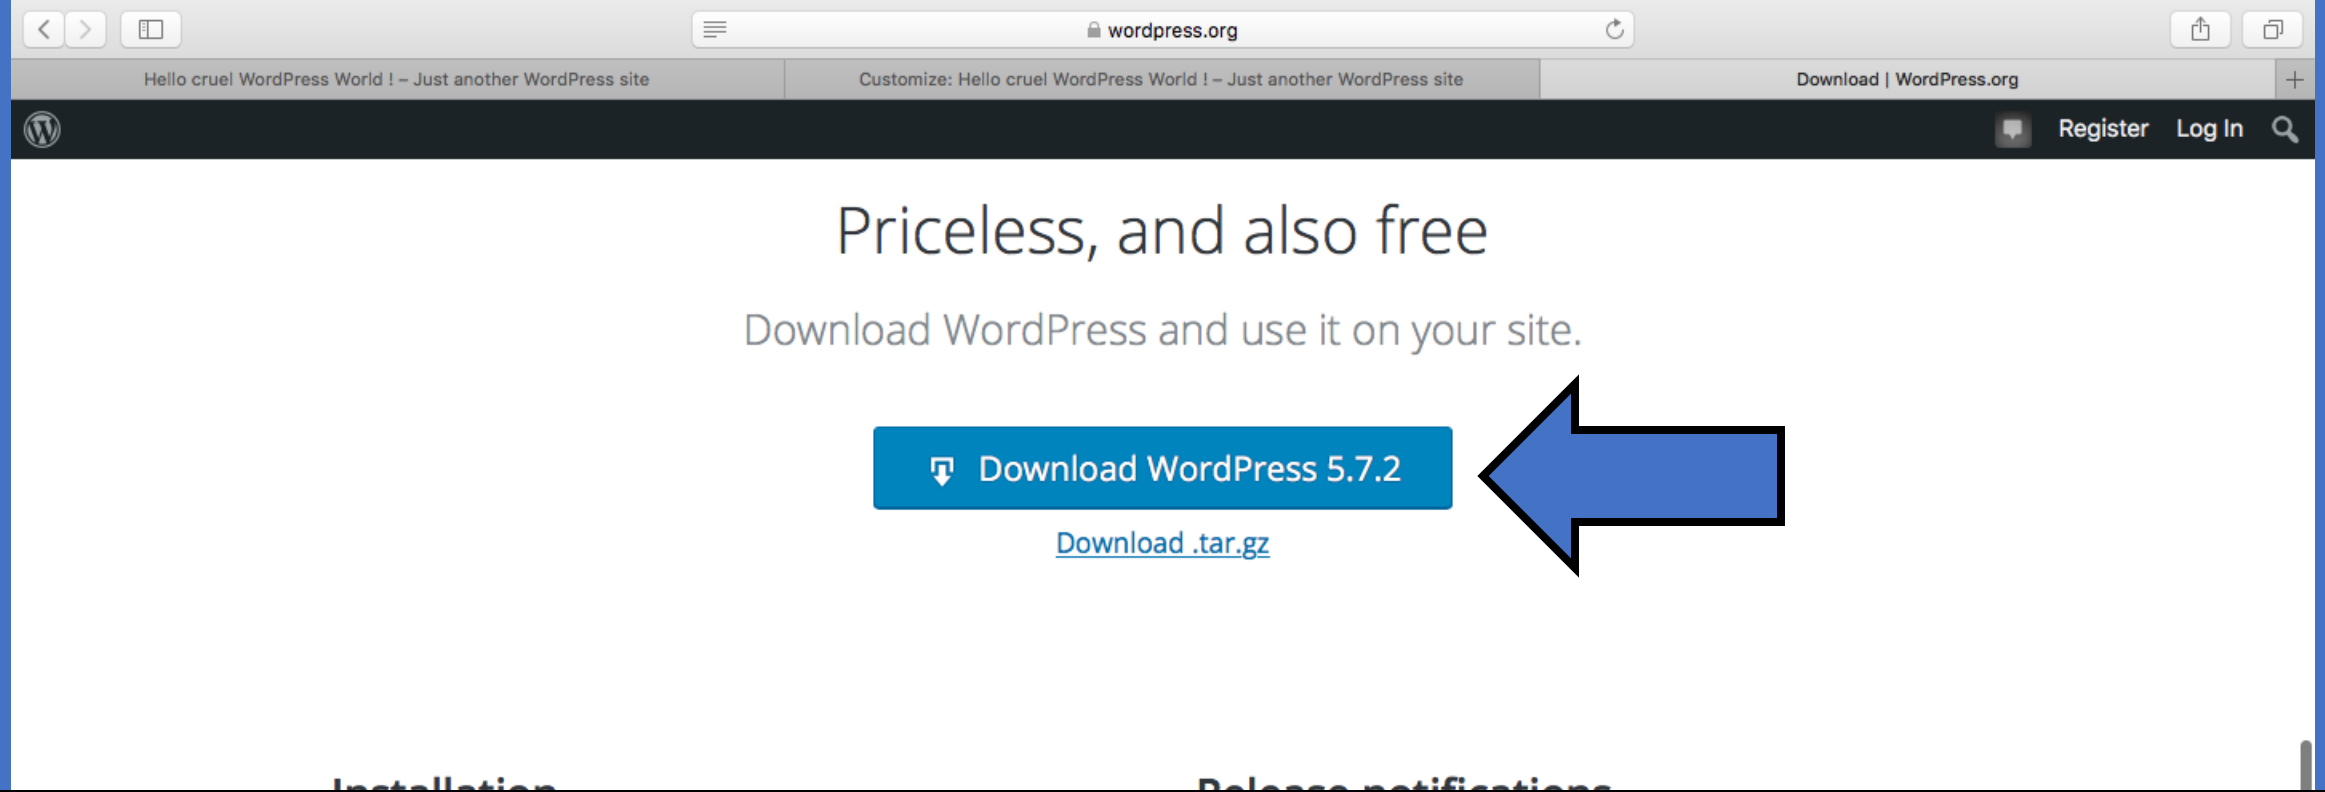

WordPress is also available in English (UK).

Beautiful designs, powerful features, and the freedom to build anything you want. WordPress is both free and priceless at the same time.

All we need to do is **repeat** the **download** and **installation process**.

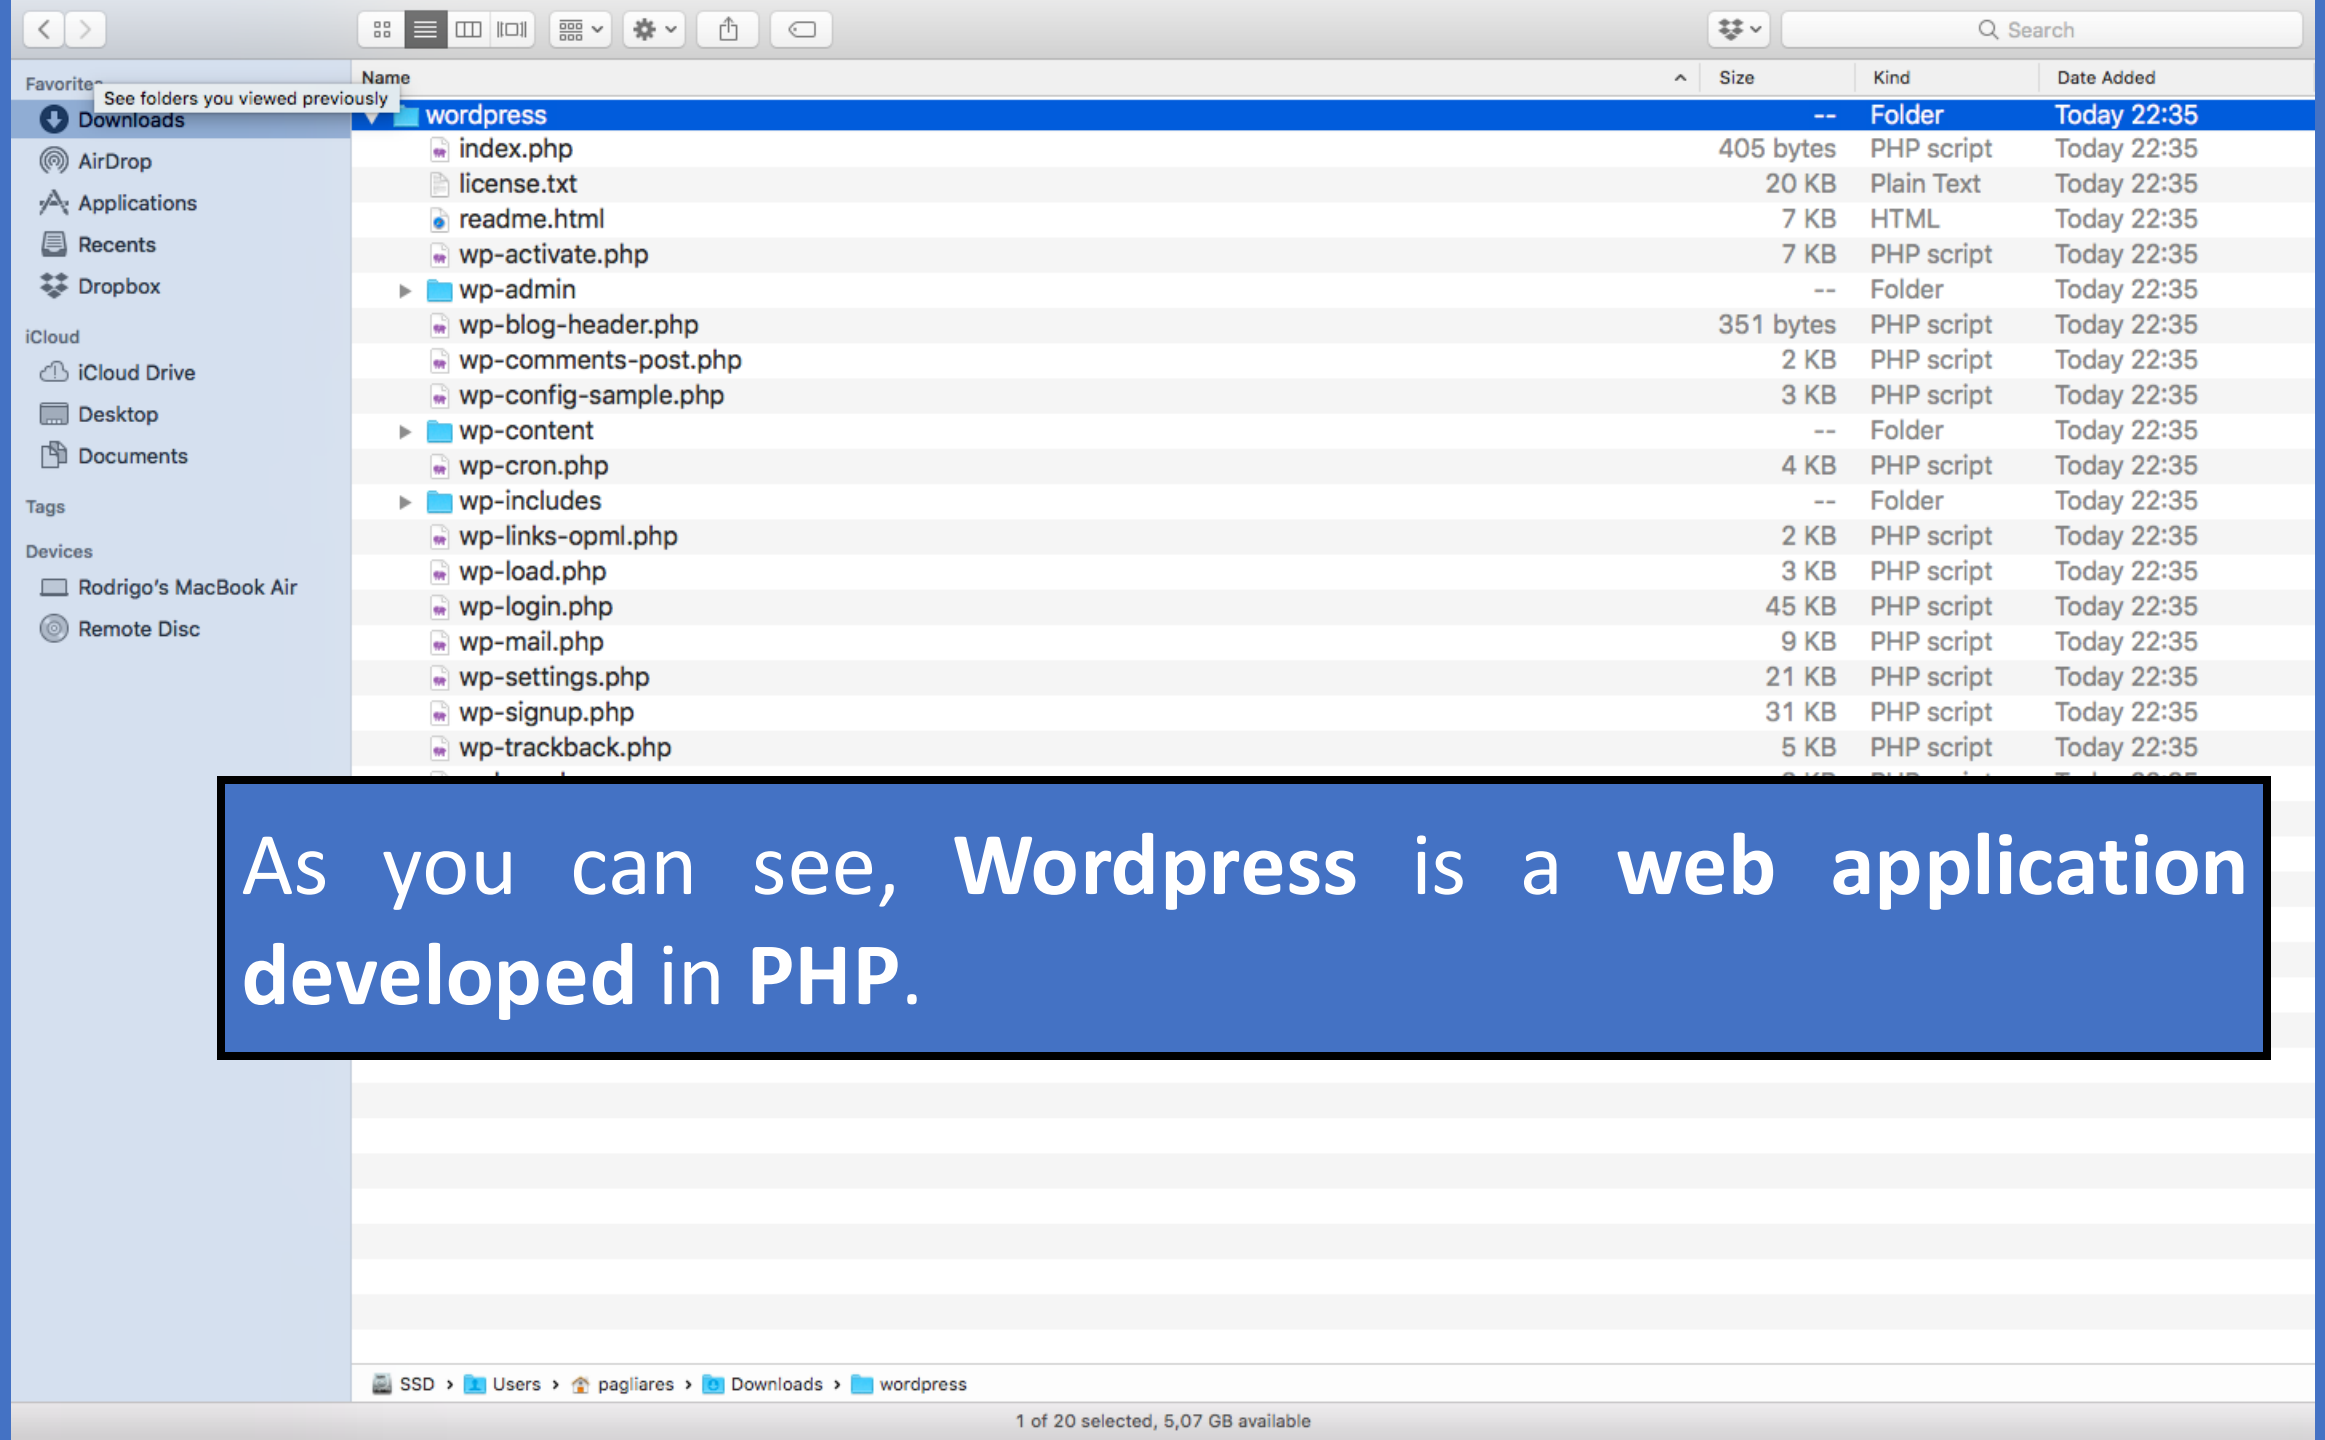

The **first site** we **created** used **WordPress version 5.5**. For this **second website** we are going to **use** a more **recent version** (**5.7.2**)

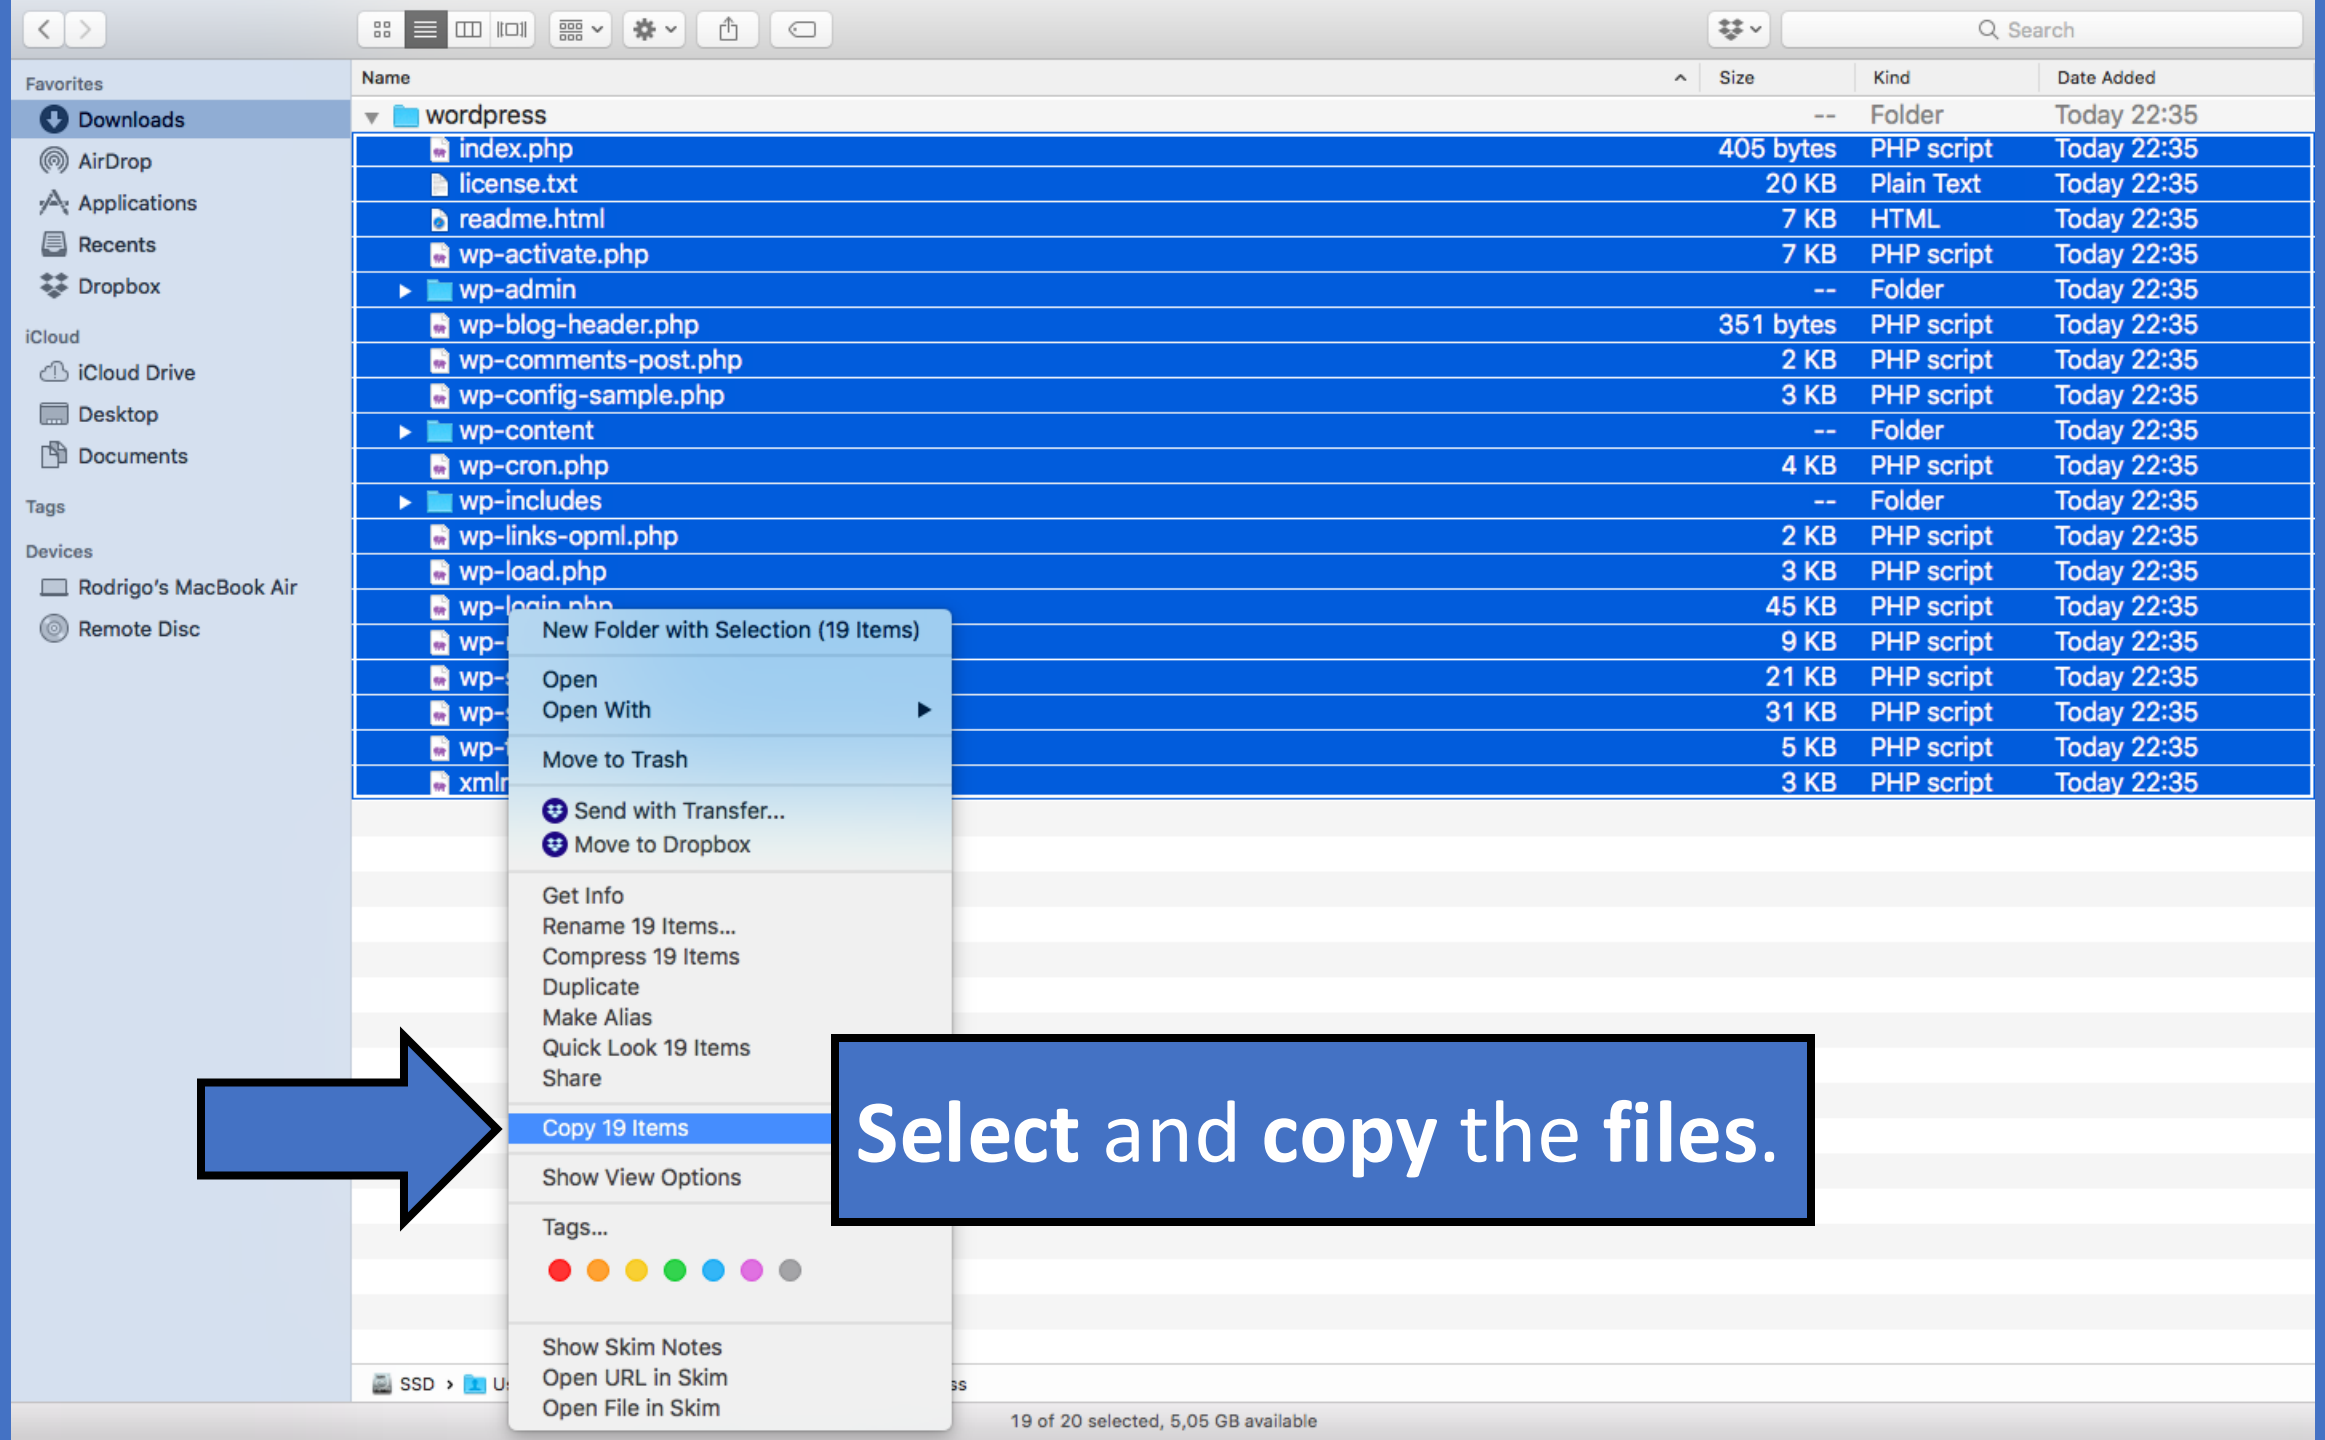

Requirements

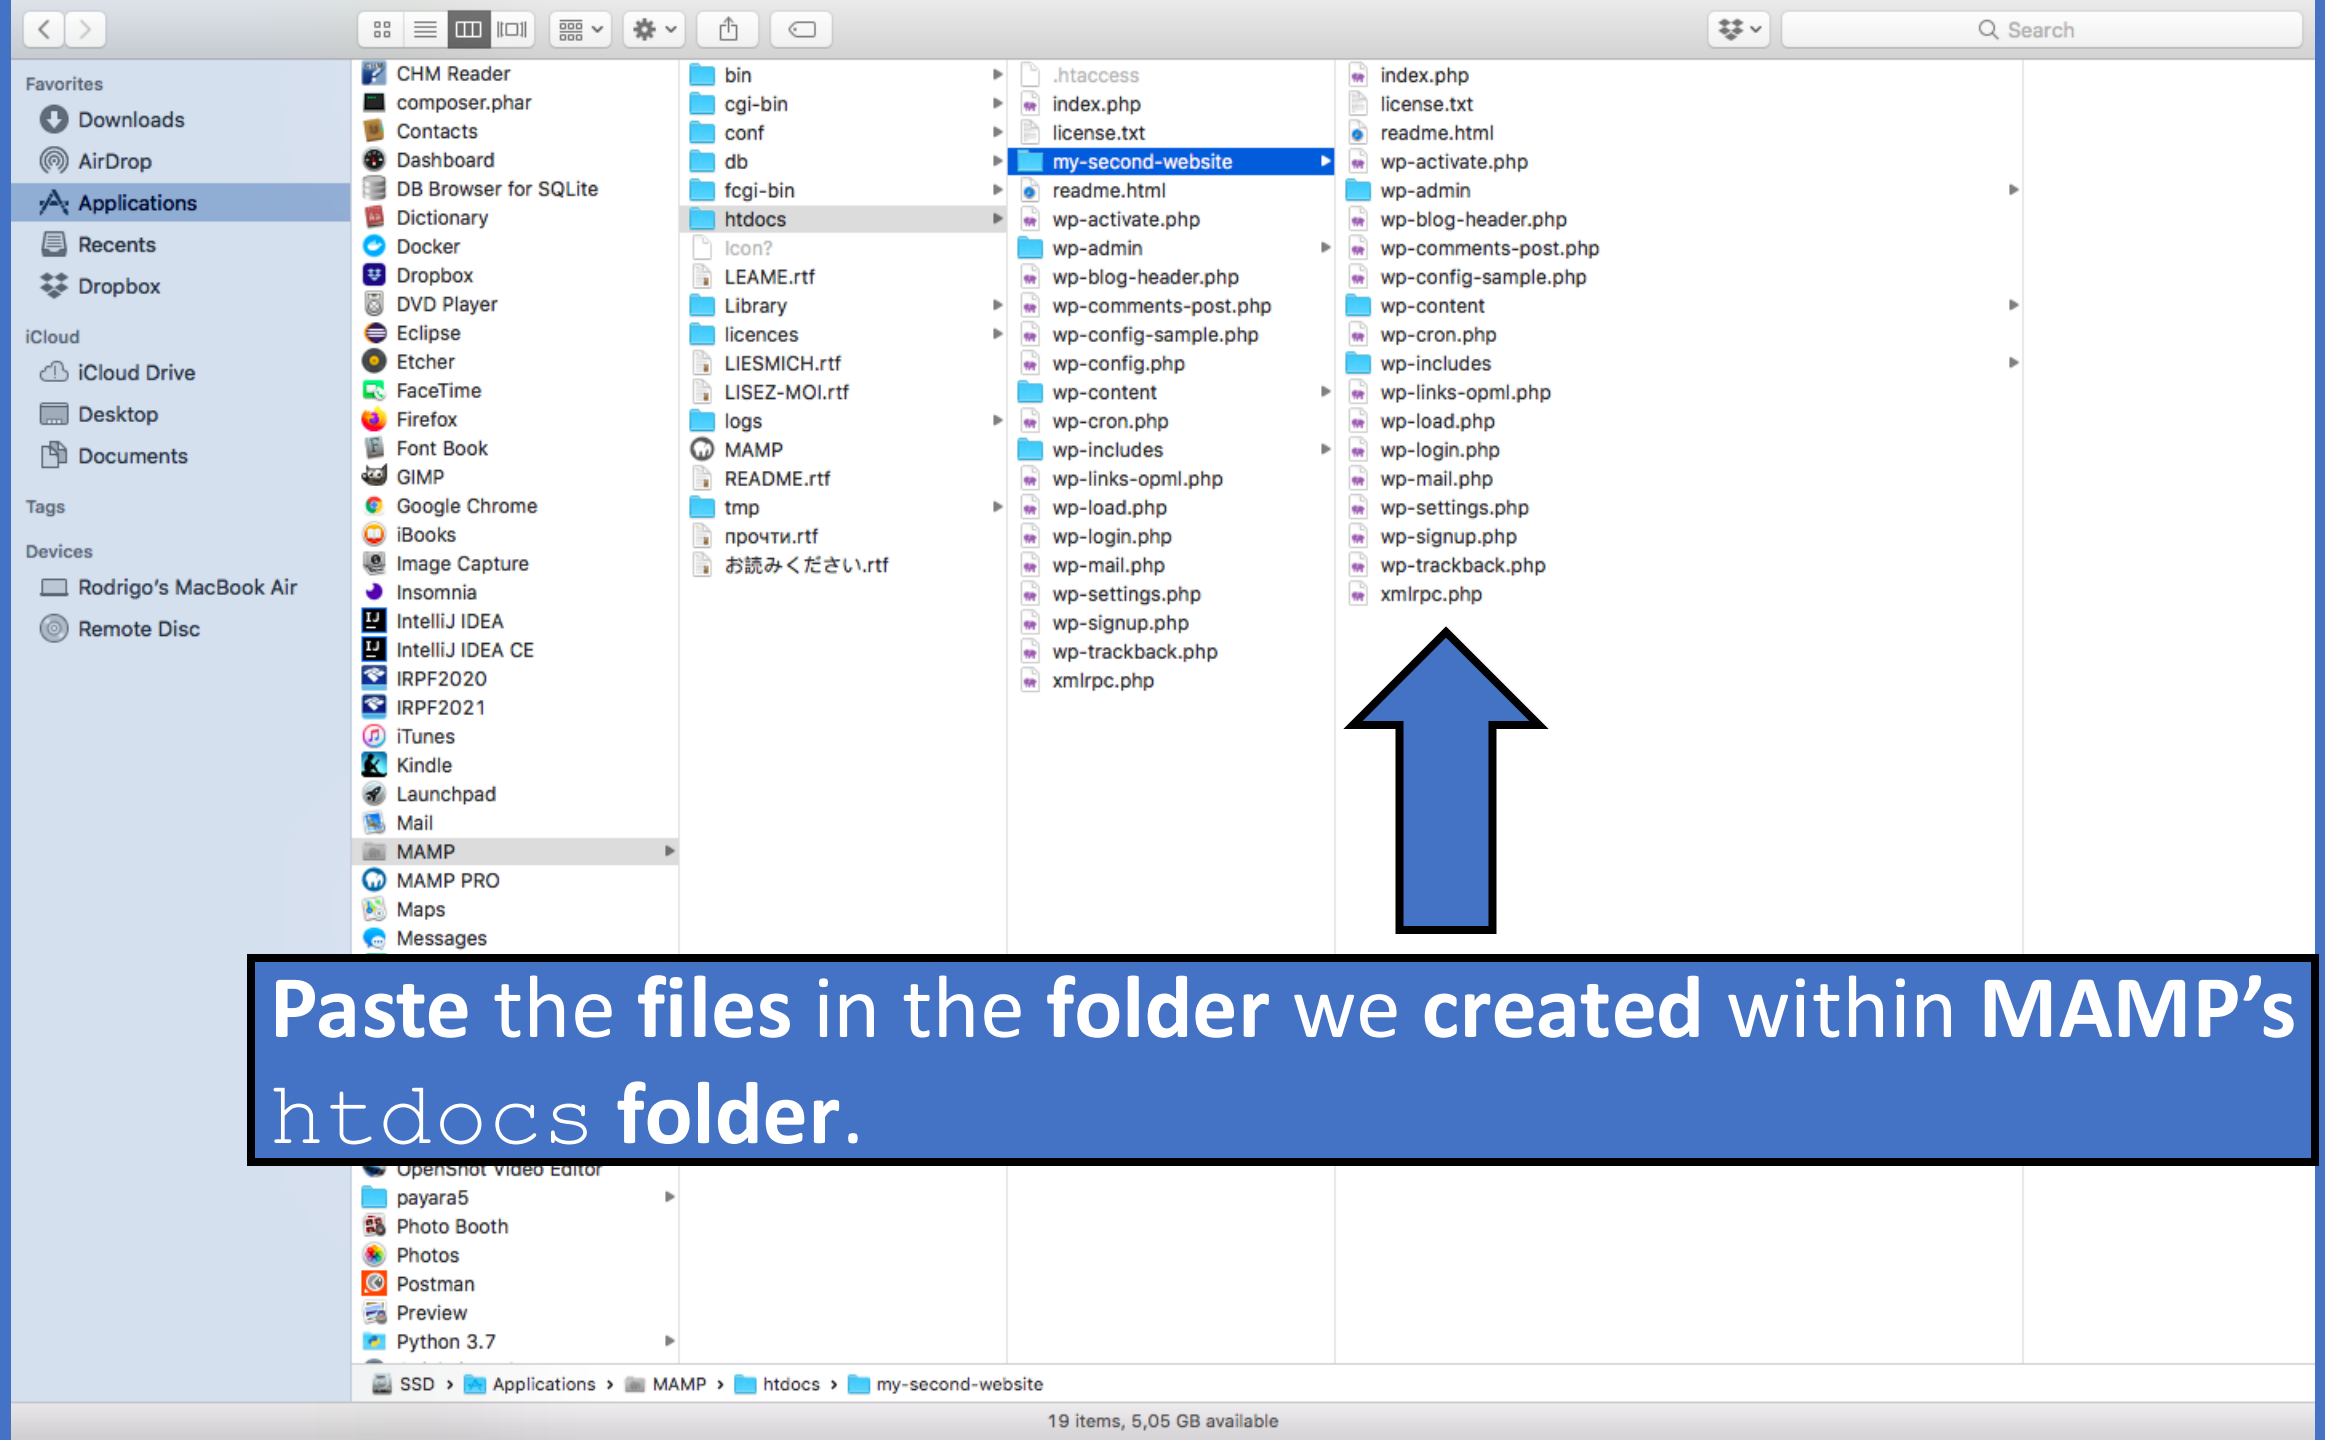

We recommend servers running version 7.4 or greater of PHP and MySQL version 5.6 *OR* MariaDB version 10.1 or greater.

A WordPress Commenter

June 18, 2021 at 1:49 am

Hi, this is a comment.

At the bottom of the **post** there is a form you can use to leave a comment for the post. This is how the visitors of the site post comments on your posts.

SECOND CRUEL WORDPRESS SITE !

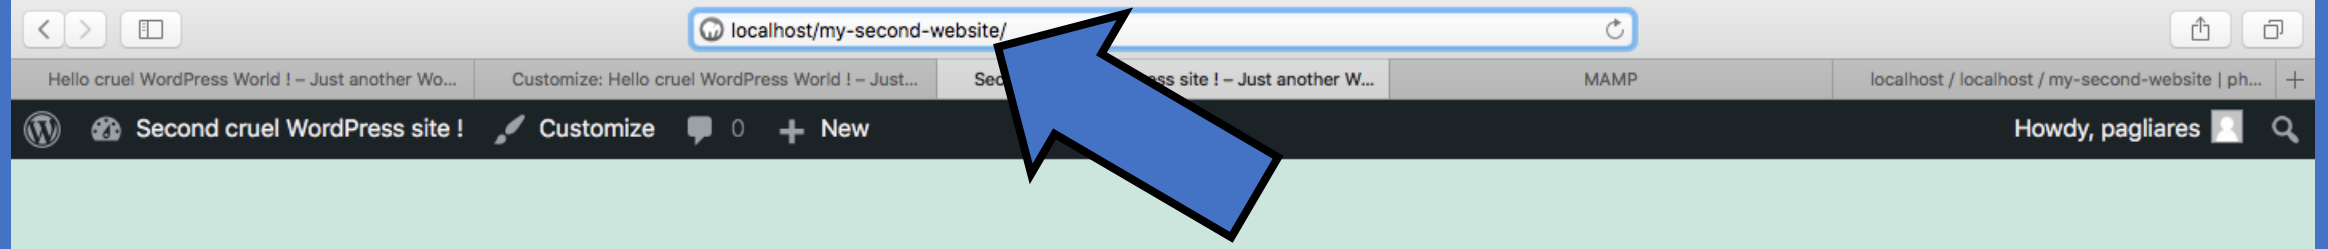

Just another WordPress site

Back to the **homepage**. Notice the **name** of the **folder** we **created** for the **second site** in the **URL**.

Welcome to WordPress. This is your first post. Edit or delete it, then start writing!

Published June 18, 2021

Categorized as Uncategorized

SECOND CRUEL WORDPRESS SITE !

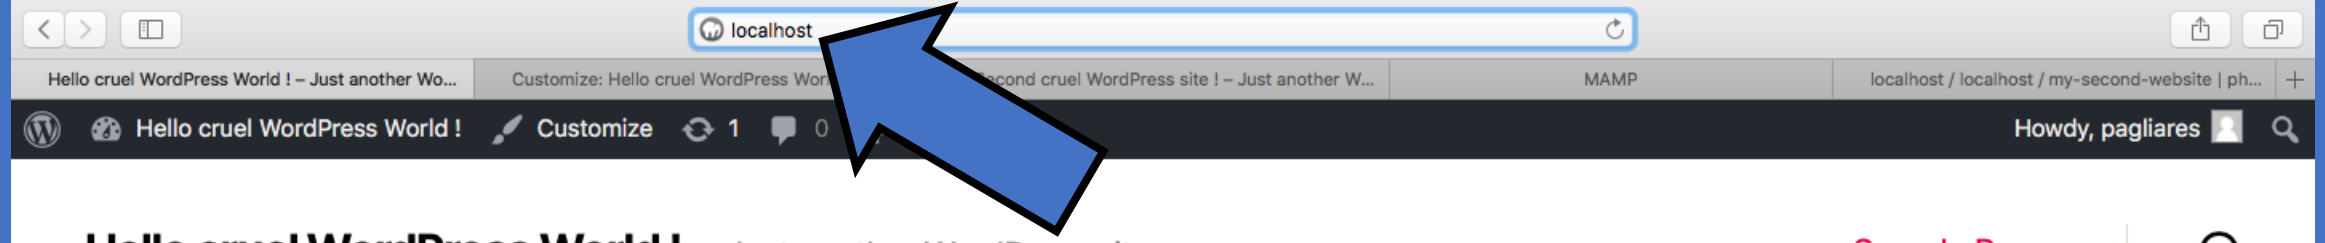

Just another WordPress site

The **second website** is under **my-second-website URL** that **maps** to the **folder** with the **same name** under `htdocs` on **MAMP**.

start writing!

Published June 18, 2021 Edit

Categorized as Uncategorized

Hello cruel WordPress World ! Just another WordPress site

Sample Page

Search

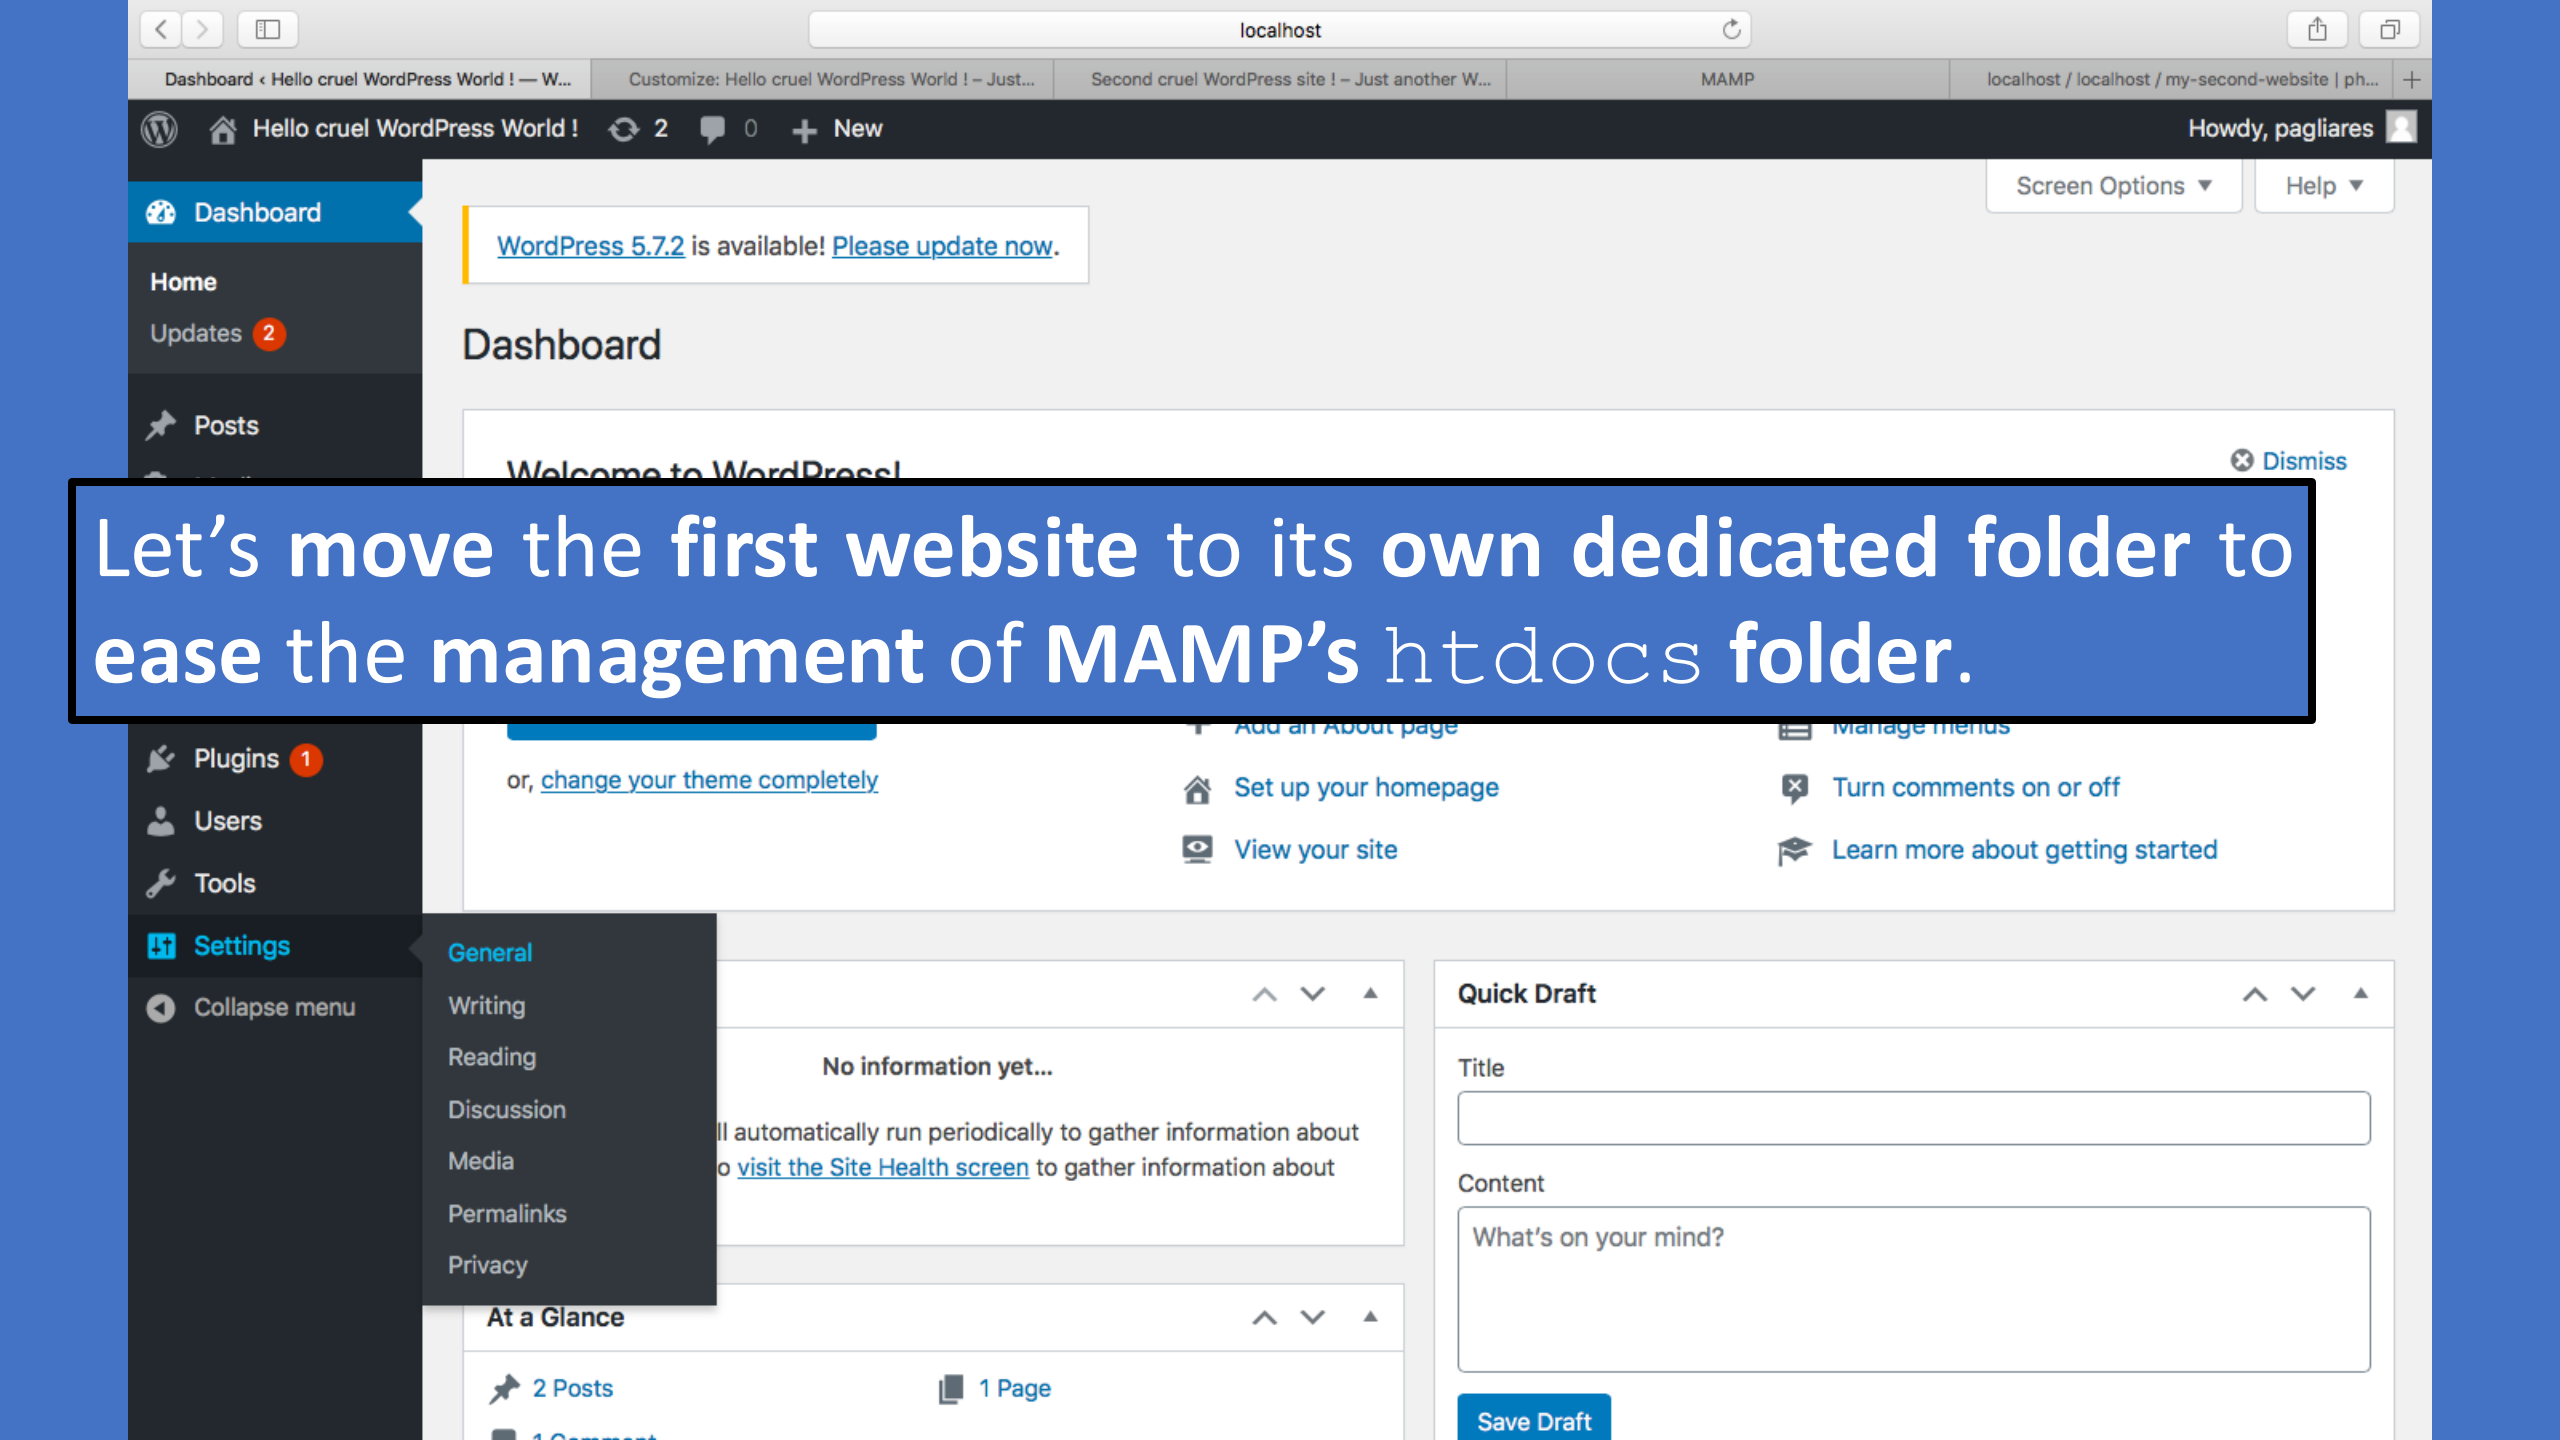

We now **have two websites**. This is the **first website**. **Notice** that it is **accessed** from the **root folder** (`htdocs`) of **MAMP** from the **URL** `http://localhost`

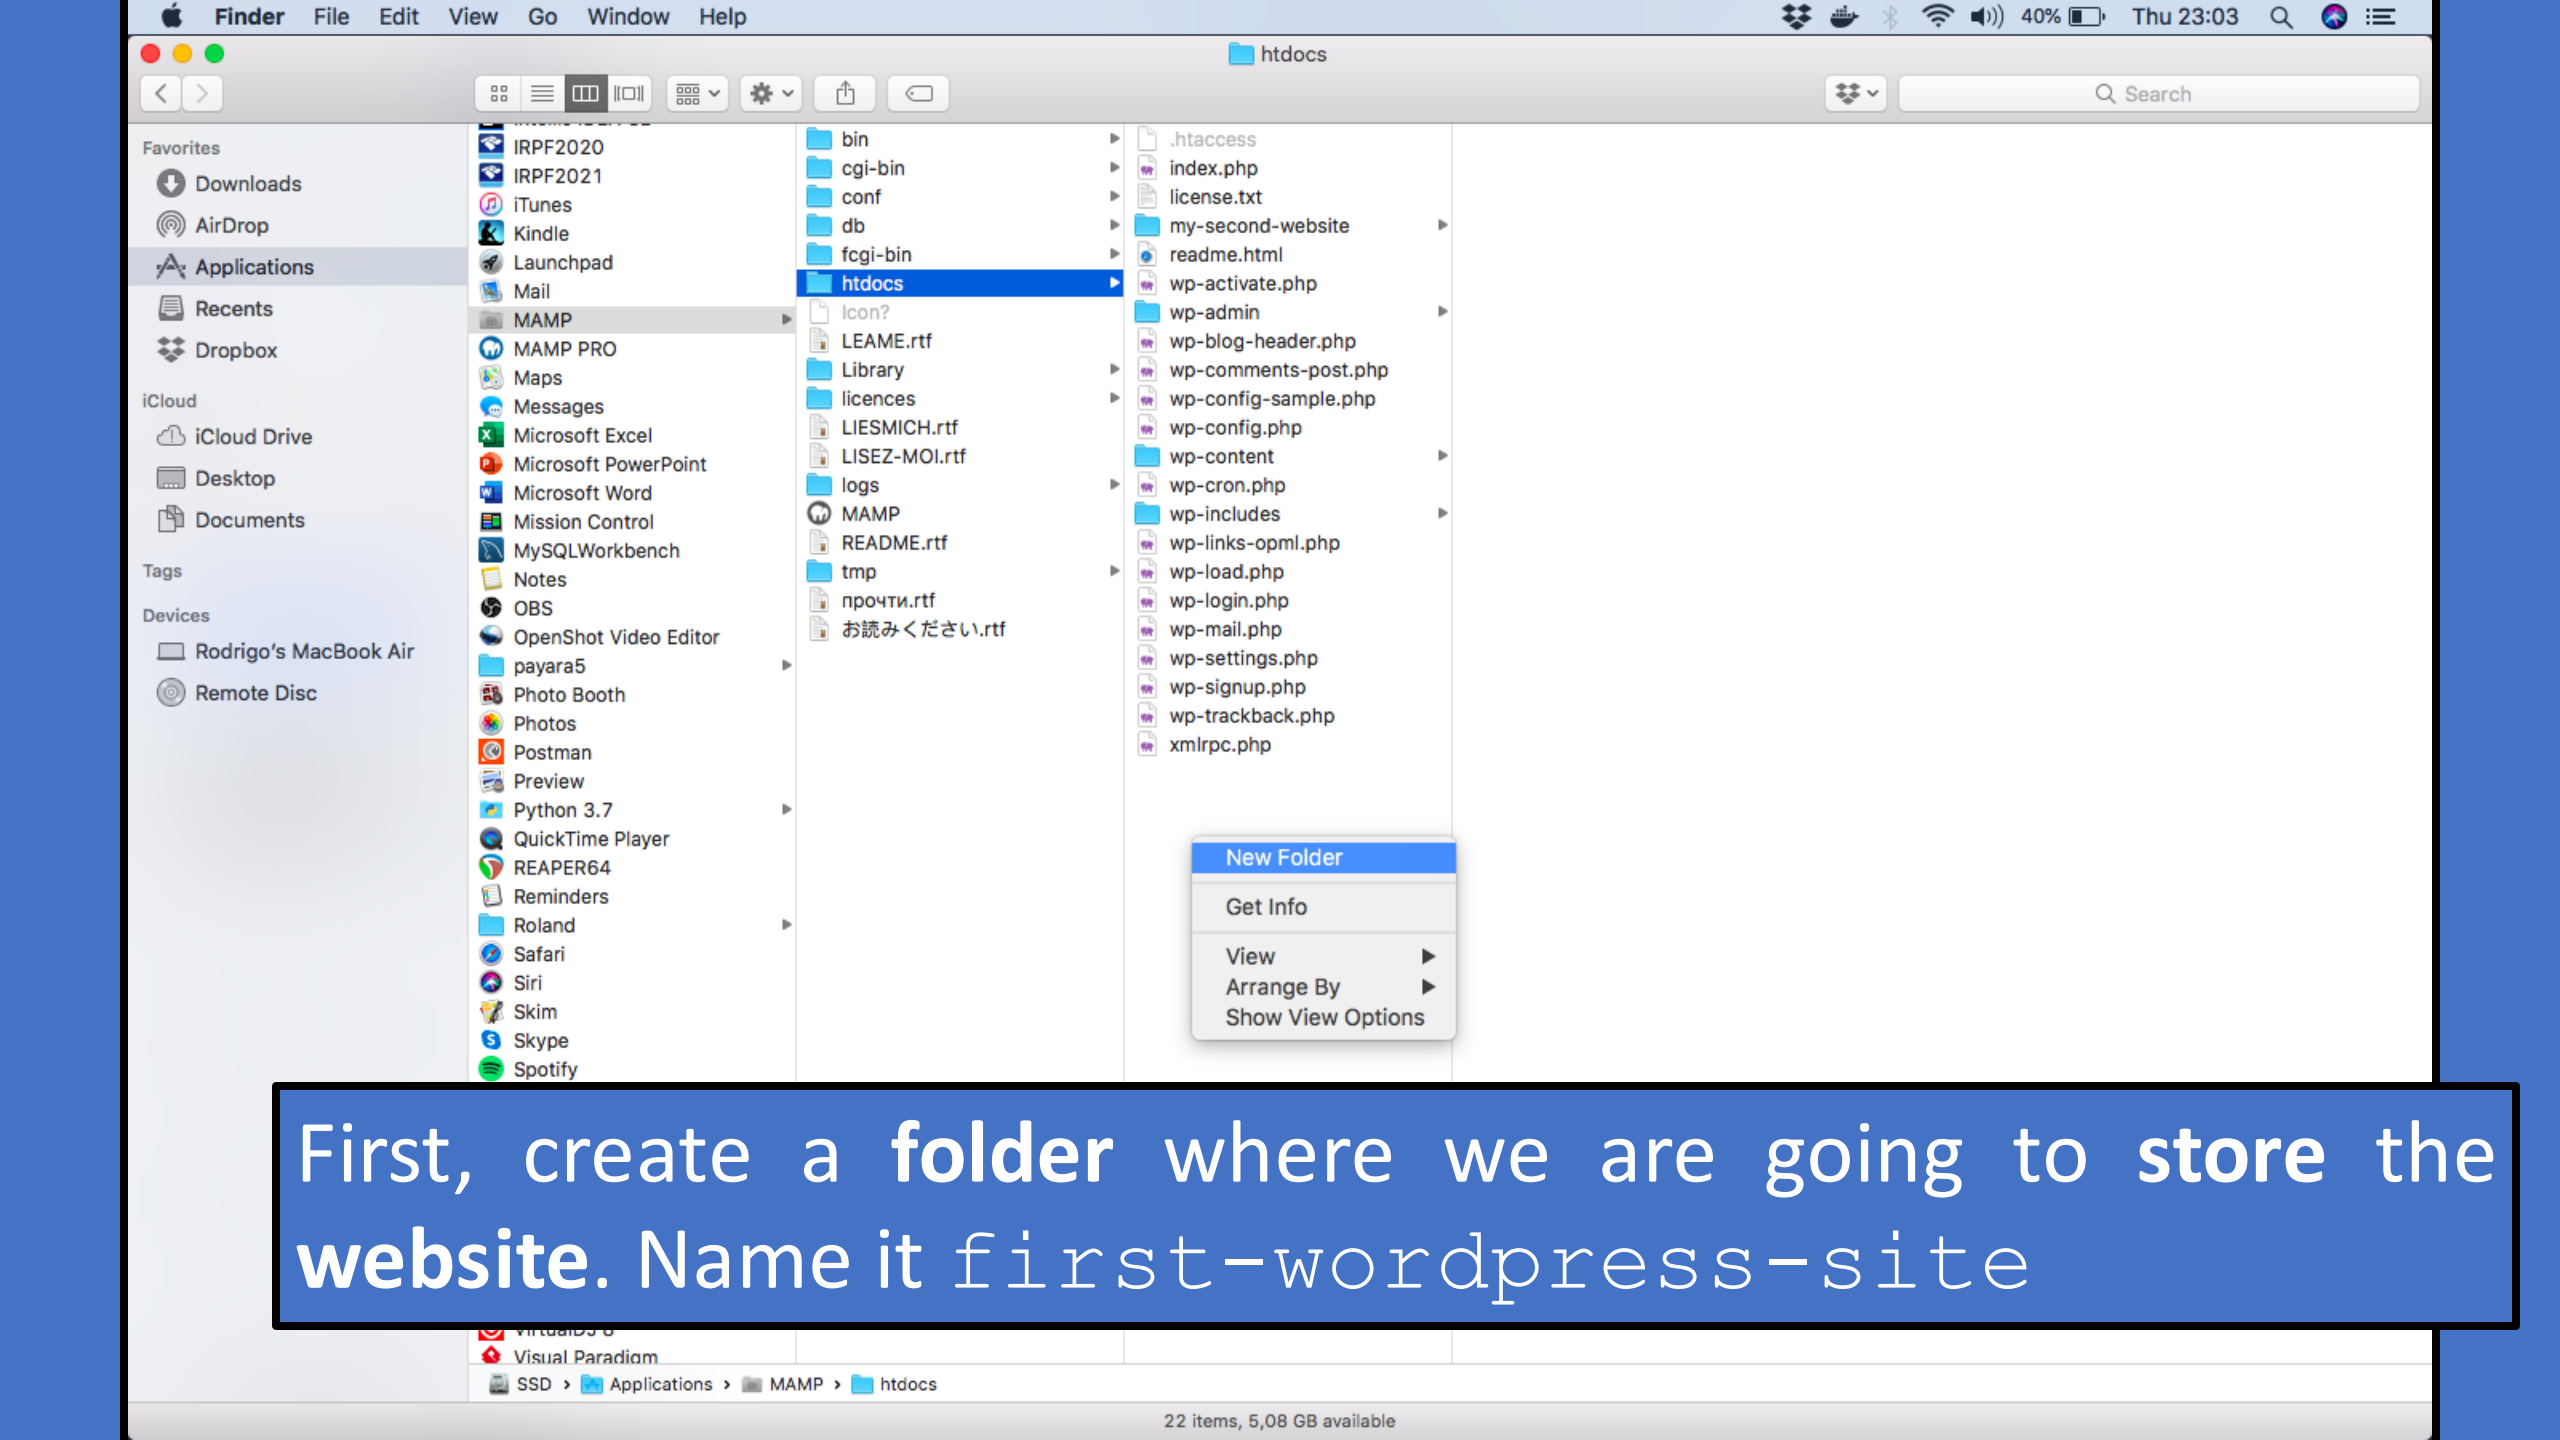

This is the first post at my WordPress site.

This is the first post at my WordPress site.
Edit

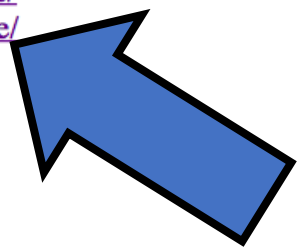

Index of /

- first-wordpress-site/
- my-second-website/

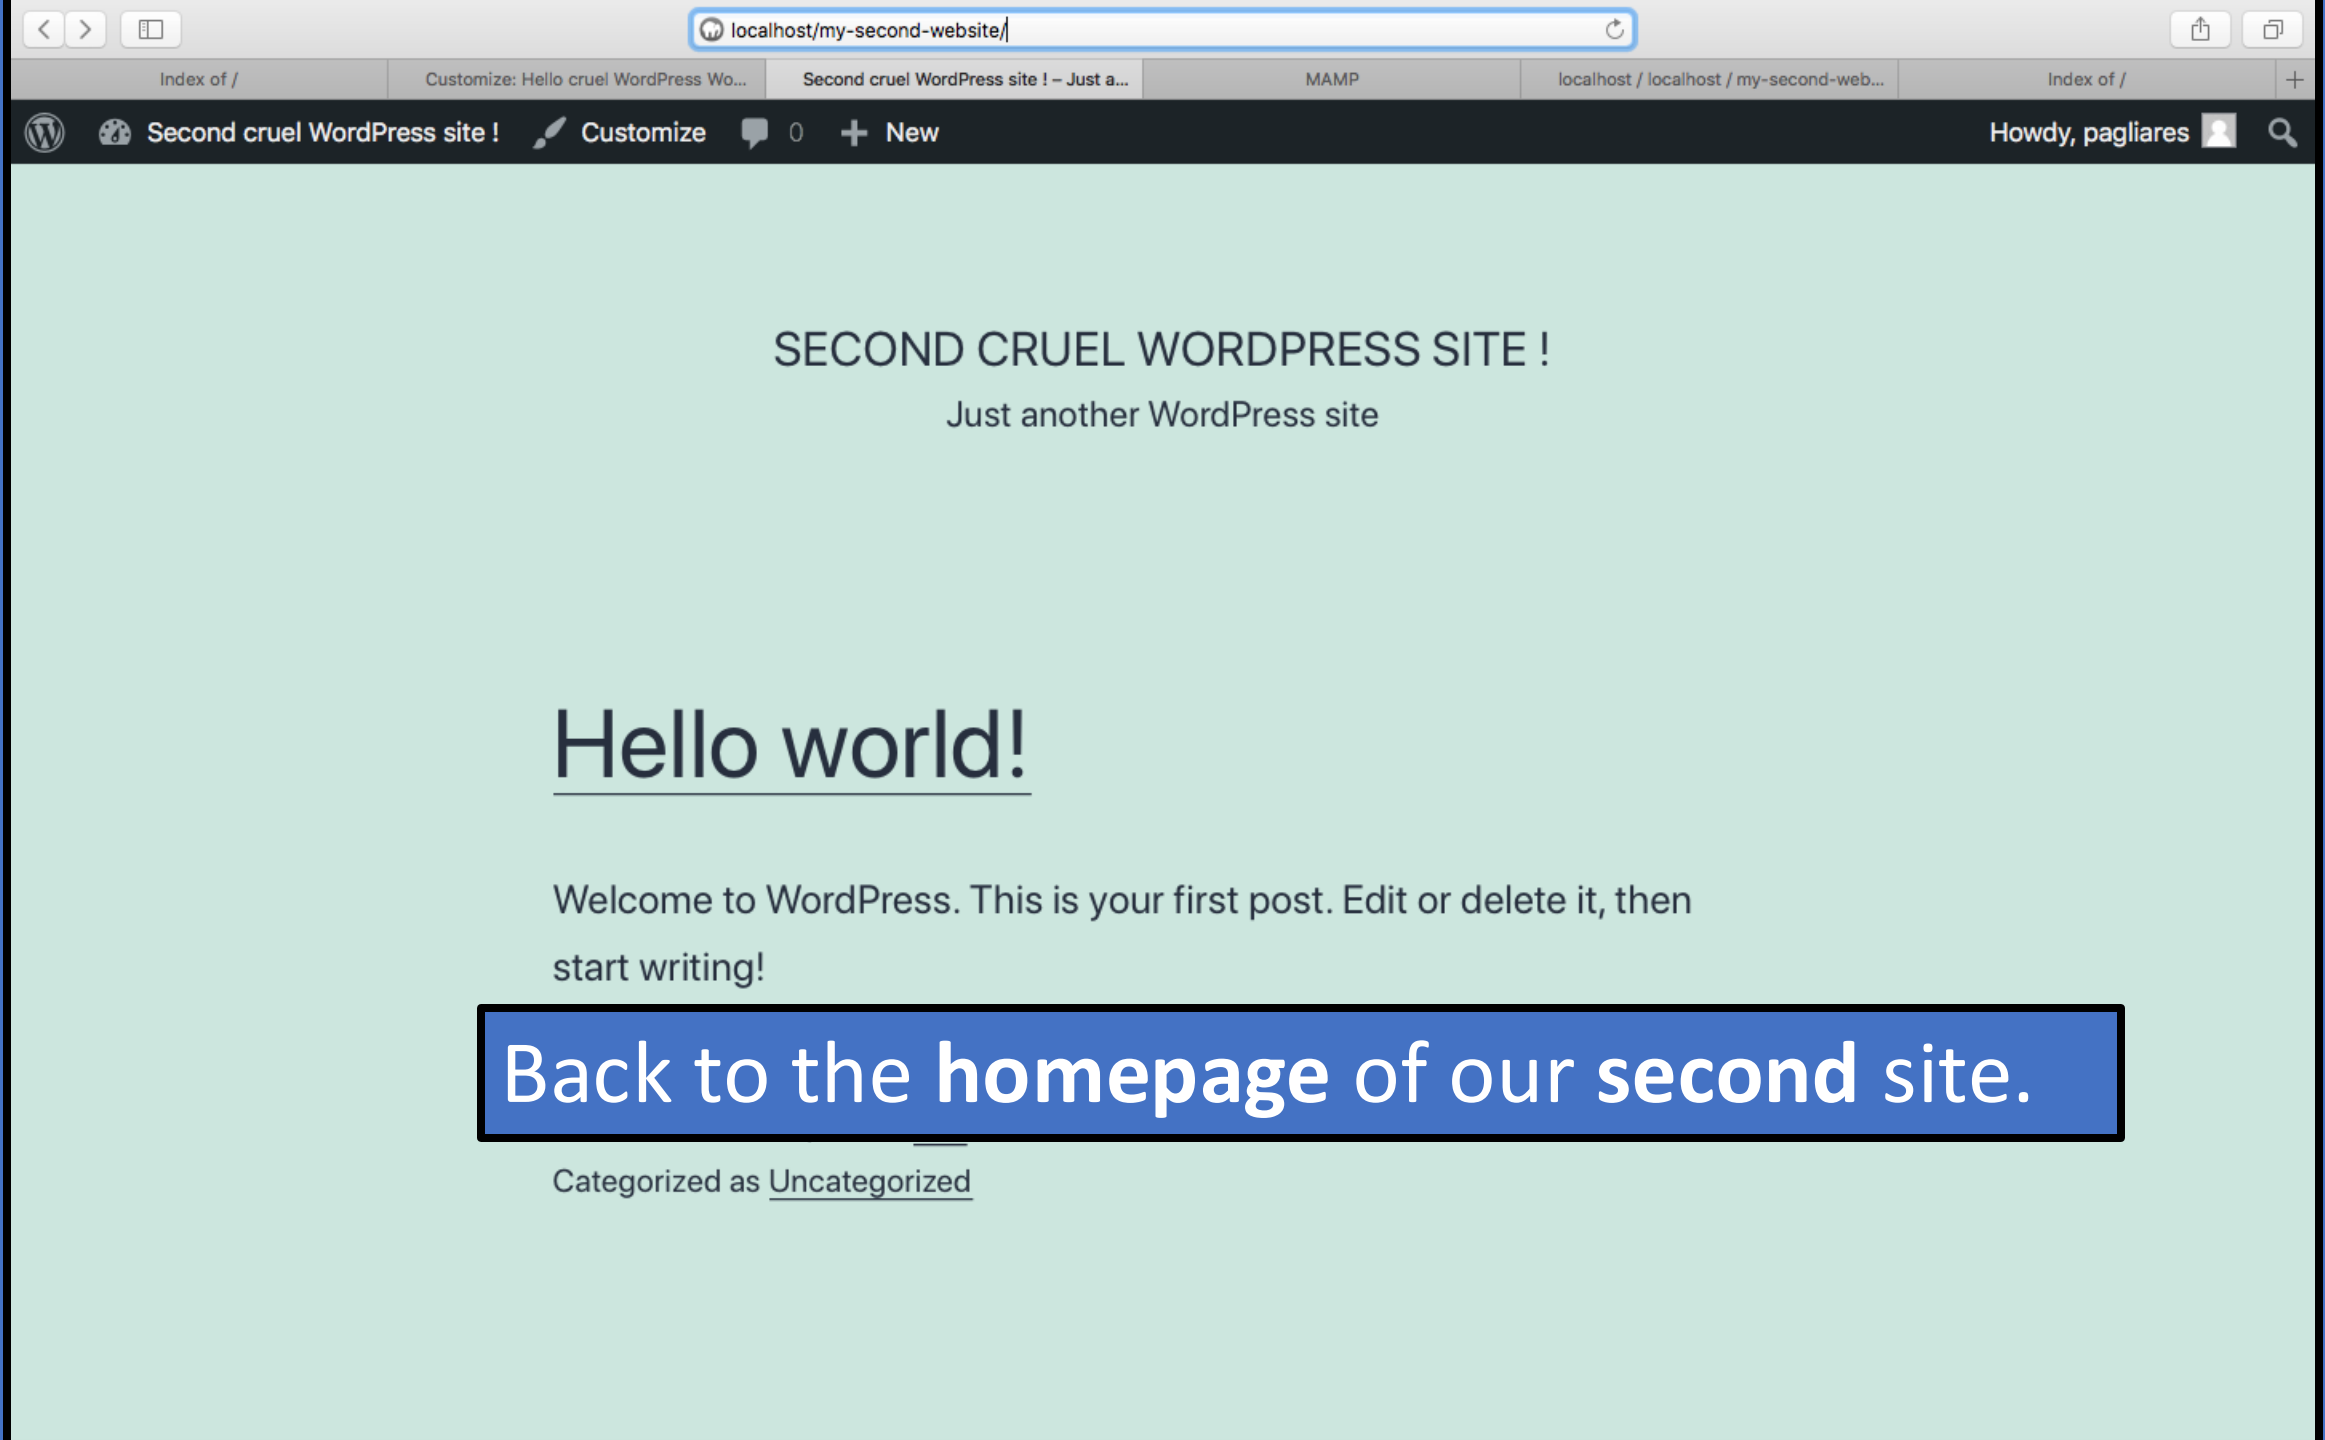

Now that we **don't** have **WordPress files** installed on **htdocs** folder, that's what **happens when we** try to **access** the **base URL** `http://localhost`

Index of /

- first-wordpress-site/
- my-second-website/

We can now **easily access** our **web projects** in an **integrated** way from **this** page. Let's **access** the **second website**.
