Professor Romário Borges
Universidade Federal de Alfenas

Tempos verbais

Presente Simples

Presente Simples

Uso: Fatos, Comportamento do sistema, Verdades gerais

Estrutura:

Sujeito + Verbo

Ex: I understand english.

Presente Simples

Exemplos:

I write code

You write code

He writes code

She writes code

It writes code

We write code

You write code

They write code

Presente Simples - (3ª pessoa)

Estrutura:

Sujeito + **verbo**
(+ **s/es** para he/she/it)

Exemplos:

- The system **processes** requests
- The API **returns** JSON
- The database **stores** data
- The function **calculates** values
- The server **handles** connections
- The developer **writes** code

Modificação dos Verbos (3ª pessoa)

Regras (he/she/it):

- Geral: **+s** (works, runs)
- -x, -ch, -sh, -ss, -o: **+es** (fixes, watches)
- Consoante + y: **-y + ies** (tries)

Exemplos:

- The system **runs** automatically (run)
- The developer **fixes** bugs (fix)
- The API **tries** to reconnect (try)
- The server **watches** requests (watch)

Presente Simples - Perguntas

Estrutura:

Do + **sujeito** + **verbo base**

ou

Does + **sujeito** + **verbo base**

Exemplos:

- **Does** the system process data?
- **Does** the API return JSON?
- **Does** the database store data?
- **Do** developers write tests?
- **Do** users access the system?

Do vs Does

Uso:

- Use **DO** com:
I, You, We, They
- Use **DOES** com:
He, She, It

Regra importante:

Após do/does, o verbo volta ao normal

Exemplos:

- **Do** you use Git?
- **Do** developers follow standards?
- **Does** the system work?
- **Does** the API respond quickly?

Presente Simple - Negativa

Estrutura:

Sujeito + **do/does** +
not + **verbo base**

Exemplos:

- The system **does not** process invalid data
- The API **does not** return null
- The database **does not** store logs
- Developers **do not** ignore errors
- The server **does not** crash
- The server **doesn't** work.
- They **don't** know how to do it.

Passado Simples

Passado Simples

Uso: Usado para ações concluídas no passado

Estrutura:

Sujeito + Verbo no passado

Ex: I **baked** a cake yesterday.

Passado Simples - verbos regulares

Regra:

Verbo + **ED**

work → work**ed**

fix → fix**ed**

deploy → deploy**ed**

update → update**ed**

Estrutura:

Sujeito + verbo no passado

Exemplo:

*The developer fix**ed** the bug*

*We deploy**ed** the system*

*The team update**ed** the
application*

Passado Simples- verbos irregulares

Regra: Não seguem regra fixa —
precisam ser memorizados

run → ran

write → wrote

go → went

build → built

Estrutura:

Sujeito + **verbo no passado**

Exemplo:

*The system **ran** yesterday*

*The developer **wrote** code*

*The team **built** the application*

Passado Simples - Exemplos

- The system **crashed**
 - The developer **fixed** the bug
 - We **deployed** the application
 - The API **returned** an error
 - The database **lost** data
 - The developer team **wrote** a terrible code
-

Passado Simples - Pergunta

Pergunta:

Did + sujeito + verbo base

Exemplos:

***Did** the system crash?*

***Did** you fix the bug?*

Passado Simples - Negativa

Regra: na negação, o verbo mantém o mesmo do presente simples

run → ran

write → wrote

go → went

build → built

Negativa:

Sujeito + **did not** + verbo base

Exemplos:

- The system **did not crash**

- We **did not deploy**

(We didn't deploy)

Futuro Simples

Futuro - Uso

Uso: Usado para planos e previsões

Estrutura:

- Sujeito + **will** + verbo
- Sujeito + **going to** + verbo

Ex: I **will** **speak** english in the future.

Futuro

- We **will deploy** the system
 - The team **will fix** the bug
 - We **are going to refactor** the code
 - The system **will improve** performance
 - We **will update** the API
-

Futuro - Negativa

- We **will not deploy** the system
 - The team **will not fix** the bug
 - We **are not going to refactor** the code
 - The system **won't improve** performance
 - We **we aren't going to update** the API
-

Futuro do pretérito

Futuro do pretérito

Uso: hipóteses / situações imaginárias, frases condicionais, pedidos mais educados

Estrutura:

- **Sujeito** + **would** + **verbo**

Ex: I **would be** an astronaut.

Futuro do pretérito

- I **would** write the code faster with better documentation.
 - You **would** write cleaner code with more practice.
 - He **would** write the API in Java.
 - She **would** write the tests first.
 - We **would** write better software with more time.
-

Futuro do pretérito - Negativa

- I **would not** write the code faster with better documentation.
 - You **would not** write cleaner code with more practice.
 - He **wouldn't** write the API in Java.
 - She **wouldn't** write the tests first.
 - We **would not** write better software with more time.
-

Exercises

1. The system _____ (process) data
2. The API _____ (return) JSON
3. The developer _____ (fix) the bug yesterday
4. We _____ (deploy) the system tomorrow
5. The system does not _____ (store) passwords
6. Does the API _____ (return) data?
7. The team _____ (update) the system last week
8. The server _____ (run) every day
9. Developers _____ (write) tests
10. The system _____ (crash) yesterday
11. I _____ create an app. (situação imaginária)
